### **hit statistics**

I use the webalizer hit statistics program to meter my hit statistics for the sheck.com website. <http://www.sheck.com/webalizer/web/> I am pleased to say that the hit statistics for this web site are very good. Take a look and see! the page view section of the statistics program shows that I this site is really shooting up due to local traffic from the Huntington WV area. This blog is the number one ranked site for "Huntington WV" on the MSN Search engine. I am pleased that this blog is quite popular and is syndicated out over a wide variety of network resources including the my yahoo service. This blog is mirrored on a bunch of other sites do the hit counter that you see on the pages of this blog is not fully indicative of all the traffic.
